01

Company Overview

Incorporation

Suncheon-based materials company,
established October 2023

Products Lineup

4 soaps, 1 toothpaste,
potassium powder material

Potassium Content

11.5% — four times that
of other feldspars

Key Partnerships

PIXON, Jeonnam Technopark(JNTP),
Suncheon National University GTEP

Business Areas

Functional Materials Supply

Mining, refining, and
micronization of potassium
feldspar, sourcing and
supply of natural minerals

Premium Product Supply

4 KALI Soaps and
K.28 premium toothpaste

OEM / ODM Services

From formulation &
design through
manufacturing and
packaging

KALIBIO's Strengths

Local resources - driven
innovation company

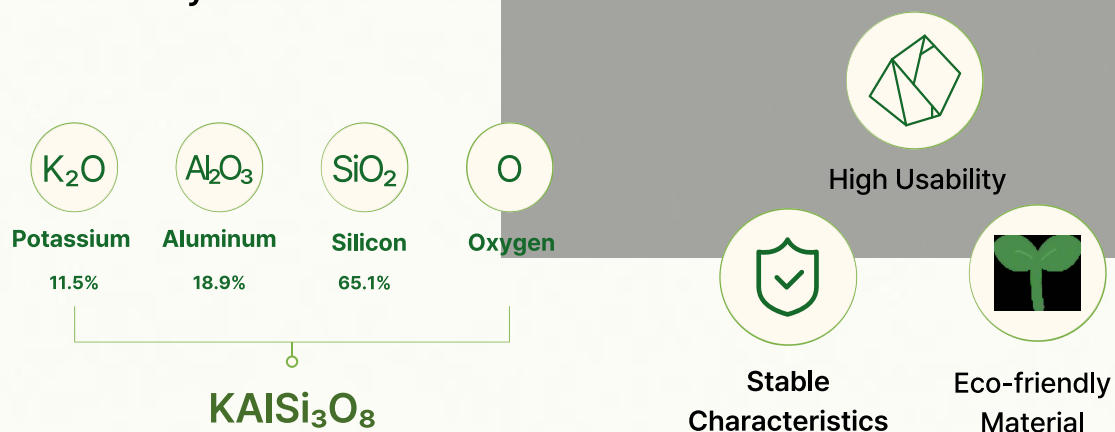

Premium products,
supply company

02 Products & Manufacturing Processes

Components and Industrial Applications

We research the functional properties of natural minerals found in Suncheon and develop them into premium, eco-friendly materials.

Main Components of Potassium Feldspar

[Laboratory : KOMIR]

Advantages of Potassium Feldspar

Extending Value Across Industries

Field	Intended use	Representative product
Personal Care	Use of mineral-Derived Raw Materials (Depending on Product Properties)	Toothpaste, Soap, and Cosmetic Ingredients
Glass	Control of melting temperature	Architectural Glass, Display Glass
Ceramics	Use of initial Sintering, and Strength Enhancement	Ceramics, Sanitary Ware
Functional Mineral Materials	Use of ultrafine functional fillers	Industrial Materials
Paint	Use of fillers	Industrial Coatings

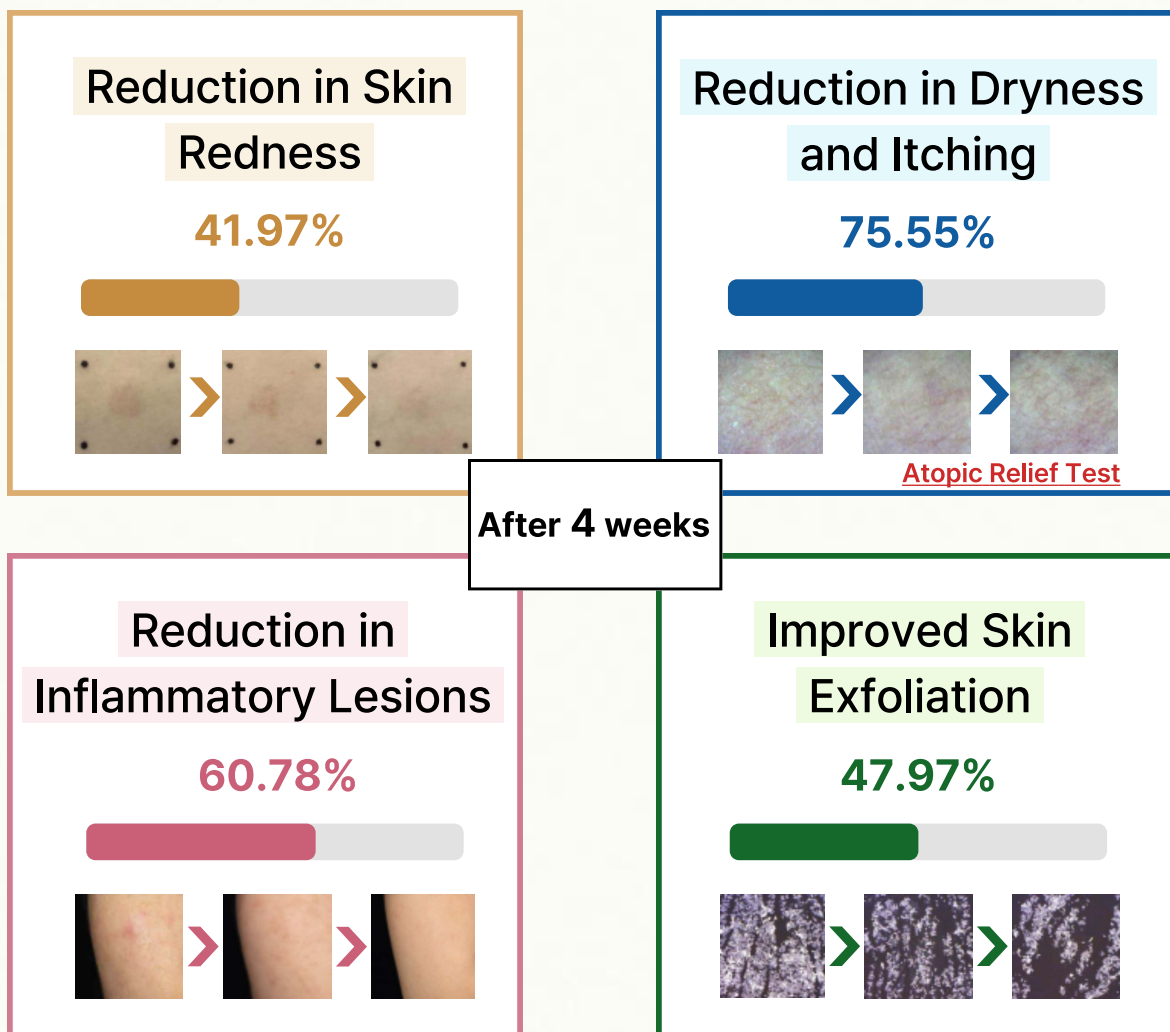

[Source: KOMIR]

02

Products & Manufacturing Processes

Efficacy of Potassium Feldspar Powder (Clinical Trial Results)

"By evaluating skin conditions before and after use, we confirmed key skin indicator changes from the application of potassium feldspar."

Through additional Clinical Trial, we have confirmed these proven benefits, including non-inflammatory lesions, lightened melasma and pigmentation, improved elasticity, and skin safety

Testing Body: KBRC (Korea Bio Clinical Research Center)

03

Products & Manufacturing Processes
